

使用 Flutter WebView 组件 flutter_inappbrowser 加载远程 web 页 面渲染新闻详情数据

主讲教师：（大地）

合作网站：www.itying.com （IT 营）

我的专栏：<https://www.itying.com/category-79-b0.html>

- 一、Flutter 实现一个简单的新闻 APP..... 1
- 二、Flutter WebView 组件 inappbrowser 的使用..... 1

一、Flutter 实现一个简单的新闻 APP

涉及的 api 接口：

新闻列表：<http://www.phonegap100.com/appapi.php?a=getPortalList&catid=20&page=1>

新闻详情：<http://www.phonegap100.com/appapi.php?a=getPortalArticle&aid=20>

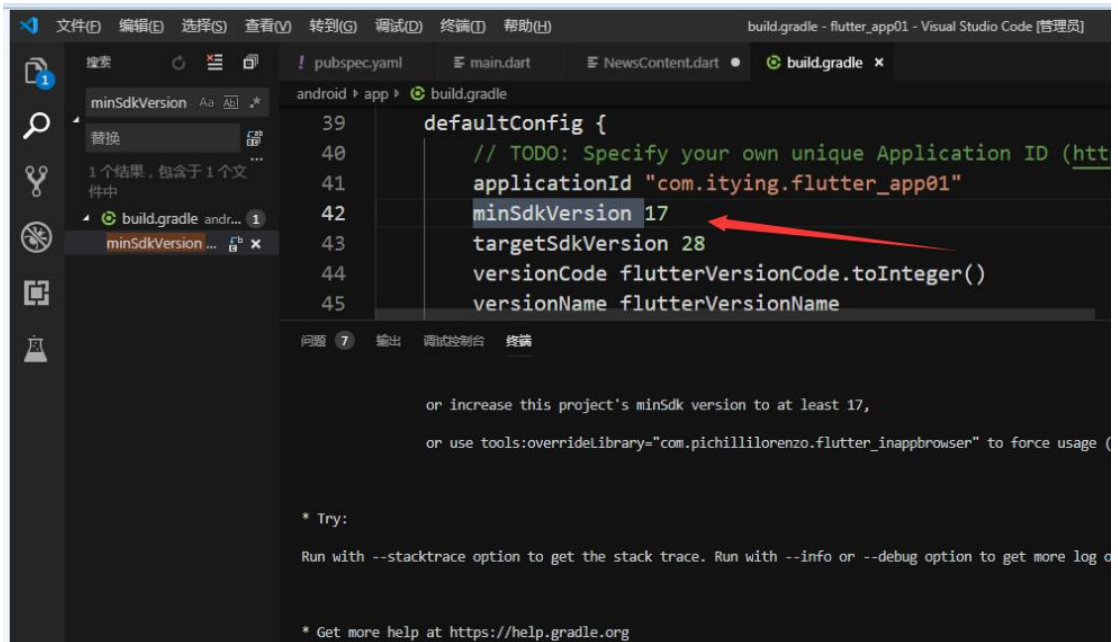

WebView 加载的远程 web 页面：

<http://www.phonegap100.com/newscontent.php?aid=198>

二、Flutter WebView 组件 inappbrowser 的使用

https://pub.dev/packages/flutter_inappbrowser

注意事项：

The screenshot shows the Visual Studio Code interface with the `build.gradle` file for an Android project. The `defaultConfig` block contains the following code:

```
39  defaultConfig {  
40      // TODO: Specify your own unique Application ID (http://  
41      applicationId "com.itying.flutter_app01"  
42      minSdkVersion 17  
43      targetSdkVersion 28  
44      versionCode flutterVersionCode.toInteger()  
45      versionName flutterVersionName  
}
```

A red arrow points to the `minSdkVersion 17` line, indicating an error. The error message in the console states:

```
or increase this project's minSdk version to at least 17,  
or use tools:overrideLibrary="com.pichillilorenzo.flutter_inappbrowser" to force usage (
```

The console also includes the following text:

```
* Try:  
Run with --stacktrace option to get the stack trace. Run with --info or --debug option to get more log c  
* Get more help at https://help.gradle.org
```
