

Flutter 下拉刷新 上拉分页加载更多

主讲教师: (大地)

合作网站: <u>www.itying.com</u> (IT 营) 我的专栏: https://www.itying.com/category-79-b0.html

一、	Flutter 下拉刷新和上拉分页	1
_,	Flutter 下拉刷新	1
三、	Flutter 上拉分页加载更多	2

一、Flutter 下拉刷新和上拉分页

在 Flutter 官方 sdk 中给我们提供了下拉刷新的组件 RefreshIndicator。但是没有提供上拉分页加载更多的组件。但是在 Flutter ListView 中有一个 ScrollController 属性,它就是专门来控制 ListView 滑动事件,在这里我们可以根据 ListView 的位置来判断是否滑动到了底部来做加载更多的处理。

Api 接口:

http://www.phonegap100.com/appapi.php?a=getPortalList&catid=20&page=1

二、Flutter 下拉刷新

```
@override
Widget build(BuildContext context) {
    return Scaffold(
        appBar: AppBar(
        title: Text("请求数据 Dio Demo"),
        ),
        body: this._list.length>0?
        RefreshIndicator(
            onRefresh: _onRefresh,
            child:ListView.builder(
            itemCount: this._list.length,
```

```
itemBuilder: (context,index){
    return ListTile(title:Text(this._list[index]["title"]));

}

)
:Text("加载中...")
);
}

Future<void>_onRefresh() async{
    print('执行刷新');
}
```

三、Flutter 上拉分页加载更多

```
_scrollController.position.pixels 滚动的距离
```

_scrollController.position.maxScrollExtent 总距离

核心代码

```
});

}
ListView.builder(
    itemCount: this._list.length,
    controller: _scrollController,
    itemBuilder: (context,index){
    }
}
```

完整代码

```
import 'dart:convert';
import 'package:flutter/material.dart';
import 'package:dio/dio.dart';

class HttpDemo extends StatefulWidget {
    HttpDemo({Key key}) : super(key: key);
    _HttpDemoState createState() => _HttpDemoState();
}

class _HttpDemoState extends State<HttpDemo> {
    ScrollController _scrollController = ScrollController(); //listview 的控制器
    List _list=[];
    int _page=1;
    bool isLoading = false; //是否正在加载数据

@override
```

```
void initState() {
    super.initState();
    this._getData();
      _scrollController.addListener(() {
         if (_scrollController.position.pixels >
              _scrollController.position.maxScrollExtent-20) {
           print('滑动到了最底部');
           _getData();
         }
    });
  }
  _getData() async{
    var
apiUrl="http://www.phonegap100.com/appapi.php?a=getPortalList&catid=20&page=${this._pag
e}";
    Response result=await Dio().get(apiUrl);
    // print(json.decode(result.data)["result"]);
    setState(() {
       this._list.addAll(json.decode(result.data)["result"]);
       this._page++;
    });
  }
   * 加载更多时显示的组件,给用户提示
   */
  Widget _getMoreWidget() {
    return Center(
       child: Padding(
         padding: EdgeInsets.all(10.0),
         child: Row(
            mainAxisAlignment: MainAxisAlignment.center,
           crossAxisAlignment: CrossAxisAlignment.center,
           children: <Widget>[
              Text(
                '加载中...',
                style: TextStyle(fontSize: 16.0),
```

```
CircularProgressIndicator(
               strokeWidth: 1.0,
          ],
       ),
     ),
  );
}
Future<void> _onRefresh() async{
     print('执行刷新');
  // this._getData();
     await Future.delayed(Duration(seconds: 3), () {
       print('refresh');
     });
}
@override
Widget build(BuildContext context) {
  return Scaffold(
     appBar: AppBar(
       title: Text("请求数据 Dio Demo"),
     ),
     body: this._list.length>0?
      RefreshIndicator(
          onRefresh: _onRefresh,
          child:ListView.builder(
            itemCount: this._list.length,
            controller: _scrollController,
            itemBuilder: (context,index){
                 if (index == this. list.length-1){
                    return Column(
                      children: <Widget>[
                         ListTile(
                           title: Text(this._list[index]["title"],maxLines: 1),
                           onTap: (){
                              Navigator.pushNamed(context, '/newsContent');
                           },
                         ),
                         Divider(),
                         _getMoreWidget()
```

```
],
                      );
                  }else{
                     return Column(
                         children: <Widget>[
                           ListTile(
                              title: Text(this._list[index]["title"],maxLines: 1),
                              onTap: (){
                                Navigator.pushNamed(context, '/newsContent');
                              },
                           ),
                           Divider()
                        ],
                      );
                  }
              }
       :_getMoreWidget()
    );
  }
}
```
