

Flutter 中获取设备信息 以及 获取地理位置

主讲教师: (大地)

合作网站: <u>www.itying.com</u> (IT 营)

我的专栏: https://www.itying.com/category-79-b0.html

一、	Flutter 中获取设备信息	1
二、	Flutter 中使用高德定位准备工作获取	1
	1 ウ取用 <i>宣传台</i> 4	
二、	Flutter 实现用高德定位]

一、Flutter 中获取设备信息

https://pub.dev/packages/device info

二、Flutter 中使用高德定位准备工作 获取 key

- 1、申请成为开发者
- 2、创建应用配置获取 Key (参考教程演示)

https://lbs.amap.com/api/android-sdk/guide/create-project/get-key

三、Flutter 实现用高德定位

https://pub.dev/packages/amap location

1、配置安装依赖

```
dependencies:
amap_location: ^0.2.0
```

2、修改 你的项目目录/app/build.gradle 在 android/defaultConfig 节点修改 manifestPlaceholders,新增高德地图 key 配置

```
android ppp  © buildgradle

manifestPlaceholders = [

AMAP_KEY : "c7f248bc22f7fd84f3e744acdc5fc5cd", // 高德地图key

50 ]

51 ]

buildTypes {

release {

// TODO: Add your own signing config for the release build.

// Signing with the debug keys for now, so `flutter run release` works.

signingConfig signingConfigs.debug

57 }

idim! 58 }

59 }

60

61 flutter {

62 source '../..'

63 }

64

65 dependencies {

implementation "org.jetbrains.kotlin:kotlin-stdlib-jdk7:$kotlin_version"

testImplementation 'junit:junit:4.12'

androidTestImplementation 'com.android.support.test:runner:1.0.2'

androidTestImplementation 'com.android.support.test.espresso-core:3.0.2'

implementation 'com.amap.api:location:latest.integration' //新灣
```

具体参考视频教程配置

3、引入库使用

```
import 'package:flutter/material.dart';
import 'package:amap_location/amap_location.dart';

class LocationPage extends StatefulWidget {
   LocationPage({Key key}) : super(key: key);

   _LocationPageState createState() => _LocationPageState();
}

class _LocationPageState extends State<LocationPage> {
   @override
   void initState() {
       super.initState();
       this._getLocation();
    }
}
```
